EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Cliff Vaterlaus, registration number 47,261 on Thursday, 08/18/05.

The application has been amended as follows:

Claim 1 is generic and allowable. Accordingly, the restriction requirement as to the encompassed species is hereby withdrawn and claims 7, 14-16, 18, 21-22 and 24-25, directed to the species of Figures 1, 2A-2B, 3A-3B, 4A-4B, 5A-5E, 6A-6B, 7A-7B, 8A-8H, and 9A-9B are no longer withdrawn from consideration since all of the claims to this species depend from or otherwise include each of the limitations of an allowed generic claim.

In view of the above noted withdrawal of the restriction requirement as to the linked species, applicant(s) are advised that if any claim(s) depending from or including all the limitations of the allowable generic linking claim(s) be presented in a continuation or divisional application, such claims may be subject to provisional statutory and/or nonstatutory double patenting rejections over the claims of the instant application. Once a restriction requirement is withdrawn, the provisions of 35 U.S.C. 121 are no

REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance:

The claims in the instant application have not been rejected using prior art because no references, or reasonable combination thereof, could be found which disclose, or suggest a an intramedullary nail comprising a proximal portion and a distal portion, the proximal portion and said distal portion defining a longitudinal axis, wherein the proximal portion comprises at least one segment that is rotatable with respect to the distal portion about the longitudinal axis and *"means for locking the at least one segment for preventing the at least one segment from rotating with respect to the distal portion"* wherein the means for locking the at least one segment comprises a locking ring, as set forth in claim 26.

The closest reference, Lower (US Patent Number 4,640,271), fails to disclose a *"means for locking the at least one segment for preventing the at least one segment from rotating with respect to the distal portion" or its equivalents thereof*, as required by 112 6th paragraph, which the applicants have invoked.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
